

iSoftenerH₂O®

A FinalBarrierWater Brand

FinalBarrierWater®

Flowing With Technology

Water: Known as the Universal Solvent. It's simple, two parts Hydrogen and one part Oxygen—but only when it remains clean. In fact there is a saying that, "Water is of undisputable quality when tested at the source, however it goes through several changes, and can take on contaminates being distributed through the pipes to the end user. Keeping water clean requires professional grade products."

Providing water that is safe, clean, clear, and free of unwanted contaminates takes caring, educated professionals who are engaged and committed to providing quality service, products, and solutions to your quality water needs.

Final Barrier Water has been presented by the water industry's leading scientists, organizations, government officials, and water treatment professionals as the best solution for treating water that is customized to each individual's use. Final Barrier Water products are exclusive, they are like no other. They are proudly made in the USA and they are backed by a team of water treatment professionals dedicated to quality water for over 60 years.

iSoftenerH₂O Softeners: The science behind quality softened water from Final Barrier Water

Whether you have city water or a private well, iSoftenerH₂O has a custom system with your name on it. As individual as you are, so is your water. Each consumer's water has its own DNA. It is as unique as you are; and should be treated with professional products that are versatile, can flow with the changing conditions, and are backed by science and professional service. iSoftenerH₂O systems are advanced, eco-friendly, flexible, service friendly, built in the USA, and come with Final Barrier Water's exclusive limited lifetime warranty.

The iSoftenerH₂O systems soften water naturally using proven Ion Exchange Technology. This results in quality water for your hair, skin, clothing, and overall appearance of your home. It protects household pipes, appliances and fixtures. And the exclusive iSoftenerH₂O DNA controller is specifically engineered by Final Barrier Water to use less energy and require less salt than other competitive brands.
